

AI Audit Report — Task 1

Student: Đặng Đăng Khoa — 23127207 **Date:** 2026-08-02 **Status:** HUMAN_REVIEWED —
EXTERNAL_EVIDENCE_BLOCKERS_DISCLOSED

Interaction log

Field	Value
AI tool	OpenAI Codex, local PowerShell/Python and the corrected Task 3 Playwright result set
User request	Repair all three tasks toward full rubric compliance; the student explicitly confirmed every human-review section.
AI use	Reconciled 58 Task 1 IDs with the final Chrome execution, copied 40 identity-overlaid screenshots, corrected requirement mismatches, regenerated Markdown/Excel/results/reports and prepared GitHub traceability.
Human review	Confirmed by the student on 2026-08-02.
Runtime provenance	../task3-cross-platform/results/chrome-windows.json and its indexed evidence.

Material corrections

- The older 36/22 checklist and 40/18 summary were replaced by one current dataset.
- Category Edit and duplicate-name rejection were removed as invented FR-14 expectations.
- The FR-02 lockout expectation now uses three attempts and 30 seconds.
- Every row records LIVE_LOCAL_SUT, MOCKED_* or EXPO_WEB_DESKTOP_BROWSER explicitly.
- Real soft-keyboard behavior remains Blocked without a phone.

Anti-fabrication declaration

No participant, pilot, GitHub URL, device run or YouTube upload was invented. Existing issue URLs were fetched from GitHub before reuse. New records remain pending until GitHub returns a real URL.
